# Highly effective.

*The CLA has a powerfully expressive design, its elegant coupe contours combined with taut flanks. What better way to complement those looks than with exclusively designed light-alloy wheels, each of which – in its own way – underlines your vehicle's different characteristics, from elegant to sporty.*

**Quality.** Precision tailored and impeccably styled for your CLA, Mercedes-Benz Light-Alloy Wheels do so much more than enhance your vehicle's looks. To help ensure safe travels, all wheel designs must pass a variety of endurance tests, based on exacting Mercedes-Benz standards. These include special test routines which simulate real challenges on the road and material tests in cutting-edge x-ray facilities. High-shine wheels undergo additional durability testing, such as exposure to highly corrosive salt spray. Only after these wheels have passed rigorous testing may they be included in the range of Genuine Mercedes-Benz Light-Alloy Wheels offered to you, allowing you to hit the open road with confidence.

Important information regarding use of KidFix child seat in the rear seat of the Cabriolet: Due to the vehicle's low roof height in the rear seat, it is important to ensure there is no contact between the vehicle's soft top and child seat headrest (when in extended position). This is necessary to avoid any potential damages to roof or child seat.

*All current Mercedes-Benz models are equipped with the Occupant Classification System (OCS) (with exception of the G-Class) which is designed to turn off the front passenger's front airbag when the system senses the weight of a typical child 12 months old or less plus the weight of a standard child restraint. See vehicle's Operator's Manual for important additional information on this system and further information regarding the transportation of children heavier than a typical 12 month old.*

*BabySmart/OCS Safety Information: Most Mercedes-Benz vehicles from MY 1998 through 2003, select models from 2004 through 2006, and current G-Class vehicles are equipped with BabySmart™. Mercedes-Benz vehicles equipped with BabySmart™ have a device that recognizes the presence of BabySmart™-equipped child seat when properly installed in the front passenger seat and deactivates the passenger front airbag (check your vehicle's Operator's Manual or labels located on the sides of your dashboard to verify).*

*All Mercedes-Benz child safety seats meet or exceed U.S. Department of Transportation standards. They are also suitable for use in older vehicles that do not have integrated LATCH (Lower Anchors and Tethers for Children) attachment points. Visit the National Highway Traffic Safety Administration's website at <http://www.NHTSA.gov> for additional information about child safety seat laws and proper use.*
