That is why Mercedes-Benz offers reliable, and updated navigation data to help get you where you need to go, effortlessly. The Navigation Map Updates are available for purchase from your authorized Mercedes-Benz dealer.

The system can route you through more than 6.1 million miles of navigable roads in the United States and Canada. BabySmart/OCS Safety Information: Most Mercedes-Benz vehicles from MY 1998 through 2003, select models from 2004 through 2006, and current G-Class vehicles are equipped with BabySmart™. Mercedes-Benz vehicles equipped with BabySmart™ have a device that recognizes the presence of BabySmart™-equipped child seat when properly installed in the front passenger seat and deactivates the passenger front air bag (check your vehicle's Operator's Manual or labels located on the sides of your dashboard to verify). All current Mercedes-Benz models are equipped with the Occupant Classification System (OCS) (with exception of the G-Class) which is designed to turn off the front passenger's front airbag when the system senses the weight of a typical child 12 months old or less plus the weight of a standard child restraint. See vehicle's operators manual for important additional information on this system and further information regarding the transportation of children heavier than a typical 12 month old. All Mercedes-Benz child safety seats meet or exceed U.S. Department of Transportation standards. They are also suitable for use in older vehicles that do not have integrated LATCH (Lower Anchors and Tethers for Children) attachment points.
