Your Mazda Dealer will provide you with a completed service checklist on every maintenance visit. In addition, your Mazda will be road tested after any servicing relating to brakes, steering or driving performance, to help verify safe functioning. Information listed in this document is accurate at time of publication and is subject to change without notice. Ask your Mazda Dealer for more detailed information. This inspection list/schedule is intended as a guide only and should not be relied upon to ensure vehicle safety. See your Mazda dealer for full details, maintenance and inspection.

Inspect is defined as: inspect and clean, repair, adjust, fill up, or replace if necessary.

*¹ Reset the engine oil data after replacing the engine oil.

*² Use of FL-22 is recommended when replacing engine coolant. Using engine coolant other than FL-22 may cause serious damage to the engine and cooling system.

*³ According to state/provincial and federal regulations, failure to perform maintenance on these items will not void your emissions warranties. However, Mazda recommends that all maintenance services be performed at the recommended kilometer period to ensure long-term reliability.

*⁴ The Tire Pressure Monitoring System (TPMS) initialization must be performed so that the system operates normally (if equipped).
