## USING THE FUEL ECONOMY GUIDE

The U.S. Environmental Protection Agency (EPA) and U.S. Department of Energy (DOE) produce the *Fuel Economy Guide* to help car buyers choose the most fuel-efficient vehicle that meets their needs. The Guide is available for free in print and on the Web at [www.fueleconomy.gov](http://www.fueleconomy.gov). For additional print copies, mail your request to: U.S. Government Publishing Office, Laurel Distribution Center, 8660 Cherry Lane, Laurel MD 20707, or enter your request electronically at <http://www.fueleconomy.gov/feg/contacts.shtml>.

## Fuel Economy Estimates

The purpose of EPA's fuel economy estimates is to provide reliable estimates for comparing vehicles.

Most vehicles in this Guide (other than plug-in hybrids) have three fuel economy estimates:

- A "city" estimate that represents urban driving, in which a vehicle is started in the morning (after being parked all night) and driven in stop-and-go traffic
- A "highway" estimate that represents a mixture of rural and interstate highway driving in a warmed-up vehicle, typical of longer trips in free-flowing traffic
- A "combined" estimate that represents a combination of city driving (55%) and highway driving (45%)

Estimates for all vehicles are based on laboratory testing under standardized conditions to allow for fair comparisons.

Flexible fuel vehicles (FFVs), which can use gasoline and E85, have estimates for both fuels. Plug-in hybrid electric vehicles (PHEVs) have estimates for (1) electric-only or blended electric and gasoline operation and (2) gasoline-only operation. PHEVs are discussed in more detail on page 34. For answers to frequently asked questions about fuel economy estimates, visit [www.fueleconomy.gov](http://www.fueleconomy.gov).

## Annual Fuel Cost Estimates

This Guide provides annual fuel cost estimates, rounded to the nearest \$50, for each vehicle. The estimates are based on the assumptions that you travel 15,000 miles per year (55% under city driving conditions and 45% under highway conditions) and that fuel costs \$3.05/gallon for regular unleaded gasoline, \$3.61 for mid-grade unleaded gasoline, and \$3.96/gallon for premium. Cost-per gallon assumptions for vehicles that use other fuel types are discussed at the beginning of those vehicle sections. The fuel costs were determined in advance to allow time for printing fuel economy labels; thus the Guide may not reflect current fuel prices.

Visit [www.fueleconomy.gov](http://www.fueleconomy.gov) to personalize fuel costs based on current fuel prices and your driving habits.

## Your Fuel Economy Will Vary

EPA's fuel economy values are good estimates of the fuel economy a typical

driver will achieve under average driving conditions and provide a good basis to compare one vehicle to another. Still, your fuel economy may be slightly higher or lower than EPA's estimates. Fuel economy varies, sometimes significantly, based on driving conditions, driving style, and other factors.

To ensure that estimates are consistent across different makes and models, the EPA estimates are based on a standardized, repeatable testing procedure. These tests model an "average" driver's environment and behavior based on real world conditions, such as stop-and-go traffic.

However, it is impossible for a single test to predict fuel economy precisely for all drivers in all environments. For example, the following factors can lower your vehicle's fuel economy:

- Aggressive driving (hard acceleration and braking)
- Excessive idling, accelerating, and braking in stop-and-go traffic
- Cold weather (engines are more efficient when warmed up). This has a greater effect for short trips.
- Driving with a heavy load or with the air conditioner running
- Improperly tuned engine or under-inflated tires
- Driving on mountainous or hilly terrain
- High-performance or snow tires
- Use of remote starters

In addition, small variations in vehicle manufacturing can cause fuel economy variations in the same make and model, and some vehicles don't attain maximum fuel economy until they are "broken in" (around 3,000–5,000 miles).

With fuel-efficient driving techniques, drivers may also achieve better fuel economy than the EPA estimates. See "Improve Your Fuel Economy" on page 4 for tips on maximizing your fuel economy.

The EPA ratings are a useful tool for comparing vehicles because they are always done in precisely the same way under the same set of conditions. However, they may not accurately predict the fuel economy you will get. This is also true for annual fuel cost estimates. For more information on fuel economy ratings and factors that affect fuel economy, visit [www.fueleconomy.gov](http://www.fueleconomy.gov).

## UNDERSTANDING THE GUIDE LISTINGS

We hope you'll find the *Fuel Economy Guide* easy to use! Fuel economy and annual fuel cost data are organized by vehicle class (see page 2 for a list of classes). Within each class, vehicles are listed alphabetically by manufacturer and model.

Vehicle models with different features, such as engine size or transmission type, are listed as different vehicles. Engine and transmission attributes are shown in the first column under the model name.

Additional attributes needed to distinguish among vehicles (e.g., fuel type or suggested fuel grade) are listed in the "Notes" column. A legend for abbreviations is provided on page 6.

A "P" in the "Notes" column indicates that the manufacturer *recommends* that the vehicle be fueled with premium-grade

gasoline, and a "PR" indicates that the manufacturer *requires* premium. The higher price of premium fuel is reflected in the annual fuel cost of these vehicles.

The most fuel-efficient vehicles in each class and alternative fuel vehicles are indicated with special markings (see diagram below). Vehicles that can use more than one kind of fuel have an entry for each fuel type.

Interior passenger and cargo volumes are located in the index at the back of the Guide.

## WHY SOME VEHICLES ARE NOT LISTED

Light-duty fuel economy regulations do not apply to

- Sport utility vehicles (SUVs) and passenger vans with a gross vehicle weight rating (GVWR) of more than 10,000 pounds—GVWR is the vehicle weight plus carrying capacity

- Other vehicles with a GVWR of 8,500 pounds or more or a curb weight over 6,000 pounds

Therefore, manufacturers do not have to estimate their fuel economy, and fuel economy labels are not posted on their windows.

Also, fuel economy information on some vehicles was not available in time to be printed in the Guide. However, you can find more up-to-date information at [www.fueleconomy.gov](http://www.fueleconomy.gov).

**Sample Vehicle Listing**  
(Not Actual Data)

| Manufacturer        | Model             | Transmission, engine size, cyl | MPG  |          | Annual Fuel Cost | GHG Rating | Notes |
|---------------------|-------------------|--------------------------------|------|----------|------------------|------------|-------|
|                     |                   |                                | Comb | City/Hwy |                  |            |       |
| <b>CHEVROLET</b>    | <b>Spark EV</b>   | A-1                            | 119  | 128/109  | \$500            | 10         | EV    |
| <b>FIAT</b>         | <b>500 Abarth</b> | A-6, 1.4L, 4cyl                | 27   | 24/32    | \$1,850          | 6          | P T   |
|                     |                   | M-5, 1.4L, 4cyl                | 30   | 28/34    | \$1,650          | 7          | P T   |
| <b>MIDSIZE CARS</b> |                   |                                |      |          |                  |            |       |
| <b>CHRYSLER</b>     | <b>200</b>        | A-9, 2.4L, 4cyl                | 28   | 23/36    | \$1,600          | 7          |       |
|                     |                   | A-9, 3.6L, 6cyl                | 23   | 19/32    | \$2,300          | 5          |       |
|                     | <b>200 FFV</b>    | A-9, 3.6L, 6cyl                | 23   | 19/32    | \$1,950          | 5          | Gas   |
|                     |                   |                                | 17   | 14/23    | \$2,300          | 6          | E85   |

**Annotations:**

- Manufacturer:** CHEVROLET, FIAT, CHRYSLER
- Model:** Spark EV, 500 Abarth, 200, 200 FFV
- Vehicle class:** MIDSIZE CARS
- Transmission information:** A=automatic, A-S=automatic transmission-select shift, AV=continuously variable transmission, M=manual, etc.) followed by number of gears or speeds
- Engine size (in liters) followed by number of cylinders:** 3.6-liter, 6-cylinder engine
- EPA city & highway MPG estimates:** EXAMPLE: 128 MPG city, 109 MPG highway
- Annual fuel cost:** \$500, \$1,850, \$1,600, \$2,300, \$1,950
- GHG Rating:** 10, 6, 7, 5, 6
- Notes:** EV, P T, Gas, E85
- EPA combined city/highway MPG estimate based on 55% city and 45% highway driving**
- Compares the tailpipe greenhouse gas emissions to those of other vehicles of the same model year on a scale of 1 (worst) to 10 (best)**
- Additional information to help further identify the vehicle (e.g., engine and fuel system info) along with other useful information about taxes, required fuel grade, etc.** EXAMPLE: P=premium gasoline recommended, T=turbocharger
- Estimated annual fuel cost, assuming 15,000 miles of travel a year (55% city and 45% highway) and an average fuel price**
- FFVs can run on gasoline or E85 (a mixture of 85% ethanol and 15% gasoline).**

## VEHICLE CLASSES USED IN THIS GUIDE

| CARS                   |                                      | TRUCKS                          |                                       |
|------------------------|--------------------------------------|---------------------------------|---------------------------------------|
| Class                  | Passenger and Cargo Volume (cu. ft.) | Class                           | Gross Vehicle Weight Rating* (pounds) |
| <b>TWO-SEATER CARS</b> |                                      | <b>PICKUP TRUCKS</b>            |                                       |
| <b>SEDANS</b>          |                                      | Small                           | Under 6,000                           |
| Minicompact            | Under 85                             | Standard                        | 6,000 to 8,500                        |
| Subcompact             | 85 to 99                             | <b>VANS</b>                     |                                       |
| Compact                | 100 to 109                           | Passenger                       | Under 10,000                          |
| Midsize                | 110 to 119                           | Cargo                           | Under 8,500                           |
| Large                  | 120 or more                          | <b>MINIVANS</b>                 |                                       |
| <b>STATION WAGONS</b>  |                                      | <b>SPORT UTILITY VEHICLES</b>   |                                       |
| Small                  | Under 130                            | Small                           | Under 6,000                           |
| Midsize                | 130 to 159                           | Standard                        | 6,000 to 9,999                        |
| Large                  | 160 or more                          | <b>SPECIAL PURPOSE VEHICLES</b> |                                       |
|                        |                                      | Under 8,500                     |                                       |

\*Gross vehicle weight rating = vehicle weight plus carrying capacity.

## TAX INCENTIVES AND DISINCENTIVES

### Federal Tax Credits

You may be eligible for a federal income tax credit of up to \$7,500 if you purchase a qualifying electric or plug-in hybrid vehicle in 2015-16.

Visit [www.fueleconomy.gov](http://www.fueleconomy.gov) for more information on qualifying models, credit amounts, and phase-out dates.

### Gas Guzzler Tax

The Energy Tax Act of 1978 requires auto companies to pay a "gas guzzler" tax on the sale of cars with exceptionally low fuel economy. Such vehicles are identified in the Guide by the word "Tax" in the "Notes" column. In the dealer showroom, the words "Gas Guzzler" and the tax amount are listed on the vehicle's fuel economy label. The tax does not apply to light trucks.

## WHY CONSIDER FUEL ECONOMY?

### Save Money

You could save as much as \$1,200 in fuel costs each year by choosing the most fuel-efficient vehicle in a particular class. This can add up to thousands of dollars over a vehicle's lifetime. Fuel-efficient models come in all shapes and sizes, so you need not sacrifice utility or size.

Each vehicle listing in the *Fuel Economy Guide* provides an estimated annual fuel cost (see page i). The Find and Compare Cars tool at [www.fueleconomy.gov](http://www.fueleconomy.gov) features an annual fuel cost calculator that allows you to insert your local gasoline prices and typical driving conditions

(percentage of city and highway driving) to obtain the most accurate fuel cost information for your vehicle.

### Reduce Oil Dependence Costs

Buying a more fuel-efficient vehicle can help reduce our dependence on petroleum. About a quarter of the oil used to produce the gasoline you put in your tank is imported. The United States uses about 19 million barrels of oil per day, of which over two-thirds is used for transportation. Oil dependence cost the U.S. economy around \$116 billion in 2014 alone.

### Reduce Climate Change

Climate change is widely viewed as the most significant long-term threat to the global environment, as well as a substantial risk to human health. Human-made emissions of greenhouse gases (GHGs) are the major cause of most of the observed global warming over the last 50 years and into the future.

Burning fossil fuels such as gasoline and diesel releases GHGs into the atmosphere, contributing to global climate change. Highway vehicles account for about 23% (1.7 billion tons) of U.S. GHG emissions each year.

The average recent-model vehicle causes the release of 7 to 9 tons of tailpipe and upstream GHGs each year, most of which is carbon dioxide (CO<sub>2</sub>). Unlike other forms of vehicle pollution, CO<sub>2</sub> emissions cannot be reduced by pollution control technologies. They can only be reduced by burning less fuel or by burning fuel that contains less carbon.

You can reduce your contribution to climate change by buying a vehicle with

better fuel economy. Switching from a vehicle that gets 20 miles per gallon (MPG) to one that gets 25 MPG can reduce GHG emissions by 1.8 tons per year.

Annual Greenhouse Gas Emissions by Vehicle MPG (gasoline vehicles)\*

\*Includes both tailpipe and upstream emissions.

You can also reduce your contribution to climate change by

- Getting the best fuel economy out of your car (see "Improve Your Fuel Economy" on page 4)
- Using a low-carbon fuel, such as electricity, from a renewable resource such as wind or hydropower
- Walking, biking, or taking public transit more often

## FUELING OPTIONS

### Ethanol Blends—E85 and E10

Ethanol is a domestically produced, renewable fuel made primarily from starch-based crops such as corn. It may also be made from "cellulosic biomass," such as crop residues and wood, but this is not yet done on a large scale. The use of ethanol as a vehicle fuel can reduce greenhouse gas (GHG) emissions and U.S. dependence on petroleum.

E10 is a blend of 10% ethanol and 90% gasoline and is legal for use in

any gasoline-powered vehicle. More than 95% of U.S. gasoline contains up to 10% ethanol to boost octane, meet air quality requirements, or satisfy the federal Renewable Fuel Standard. Vehicles typically go 3%–4% fewer miles on E10 compared to 100% gasoline because ethanol contains less energy than gasoline.

E85 is a high-level ethanol-gasoline blend containing 51%–83% ethanol, depending on the season and geographic location. Drivers can use E85 in flexible fuel vehicles (FFVs), which are specially designed to run on gasoline, E85, or any mixture of the two. FFVs are offered by several vehicle manufacturers. To determine whether your vehicle is an FFV, check the inside of your car's fuel filler door for an identification sticker or consult your owner's manual. More than 2,600 filling stations in the United States currently sell E85. Visit [afdc.energy.gov/locator/stations](https://afdc.energy.gov/locator/stations) to find stations near you.

FFVs typically experience a 15%–30% drop in fuel economy when operating on E85 instead of regular gasoline due

to ethanol's lower energy content and other factors, assuming gasoline typically contains about 10% ethanol. However, drivers should notice no degradation in performance.

## Biodiesel

Biodiesel is a domestically produced renewable fuel manufactured from vegetable oils or animal fats for use in diesel vehicles. Using biodiesel in place of petroleum diesel can reduce GHG emissions and contributes to national energy security.

Biodiesel can be blended with petroleum diesel at any percentage. The most common biodiesel blend is B20, which contains 20% biodiesel and 80% petroleum diesel. B5 (5% biodiesel and 95% petroleum diesel) is another common blend. All vehicle manufacturers have approved biodiesel blends up to and including B5 for use in all diesel engines, and some have approved the use of blends up to B20 in a few recent model year vehicles. Keep in mind that using higher-level biodiesel blends may affect

your vehicle warranty. Check your owner's manual or with your vehicle manufacturer to determine the right blend for your vehicle.

**Purchase commercial-grade biodiesel from a reputable dealer. Never refuel with recycled grease or vegetable oil that has not been converted to biodiesel. It will damage your engine.**

Almost 250 stations currently dispense B20. Visit [afdc.energy.gov/locator/stations](https://afdc.energy.gov/locator/stations) to find service stations selling biodiesel near you.

## Premium- vs Regular-Grade Gasoline

Regular unleaded is the recommended gasoline for most cars. Using a higher-octane gasoline than recommended by the owner's manual does not improve performance or fuel efficiency; it only costs more money. Check your owner's manual to determine the lowest grade of fuel you can use.

## FUEL ECONOMY AND ANNUAL FUEL COST RANGES FOR VEHICLE CLASSES

The graph below provides the fuel economy and annual fuel cost ranges for the vehicles in each class so you can see where a given vehicle's fuel economy and cost fall within its class. The graph uses combined city and highway MPG estimates, which assumes you will drive 55% in the city and 45% on the highway. Annual fuel costs assume that you travel 15,000 miles each year and that fuel costs \$3.05/gallon for regular unleaded gasoline, \$3.96/gallon for premium, \$3.52/gallon for diesel, and \$.15/kWh for electricity. Visit [www.fueleconomy.gov](https://www.fueleconomy.gov) to calculate the annual fuel cost for a specific vehicle based on your own driving conditions and fuel prices.

Fuel economy estimates on this chart do not include vehicles operating on compressed natural gas (CNG), hydrogen, or E85.

\* This range represents electric vehicles and/or plug-in hybrids. Fuel economy values for these vehicles are in miles per gallon gasoline equivalent (MPGe). Estimates for plug-in hybrids assume both gasoline and electric operation.

† Plug-in hybrids are included in this range.

‡ This range represents electric vehicles. Fuel economy values are in miles per gallon gasoline equivalent (MPGe).

§ Fuel cell vehicle

## ADVANCED VEHICLE TECHNOLOGIES

Manufacturers are using advanced technologies to improve fuel economy in many of their vehicles. Along with hybrids, plug-in hybrids, and all-electric vehicles, new technologies are being used to make conventional vehicles more efficient as well. Some of these fuel-saving technologies are described below. For more information on these and other technologies, visit [www.fueleconomy.gov](http://www.fueleconomy.gov).

### Start-Stop Systems

Start-stop systems (sometimes called idle-stop, smart start, or other manufacturer-specific names) save fuel by turning off the engine when the vehicle comes to a stop and automatically starting it back up when you step on the accelerator. Start-stop can improve fuel economy by 4%–5% and provides the biggest benefit in conditions where the engine would otherwise be idling, such as stop-and-go city driving. These systems are currently available on over 250 conventional vehicle models from several manufacturers.

### Cylinder Deactivation

Cylinder deactivation "turns off" some of the engine's cylinders when they are not needed. This temporarily and seamlessly turns an 8- or 6-cylinder engine into a more efficient 4- or 3-cylinder engine.

### Turbocharging

Turbocharging increases engine power, allowing a smaller, more fuel-efficient engine to be used in place of a larger one. Replacing an 8-cylinder engine with a turbocharged 6-cylinder or a 6-cylinder engine with a turbocharged 4-cylinder can save fuel and still provide extra power when needed.

### Advanced Transmissions

The advanced electronics in today's vehicles can optimize gear shifting for improved fuel efficiency. Six-, 7-, and 8-speed automatic transmissions are becoming common, and some have even more gears. Continuously variable transmissions (CVTs) can change seamlessly through an infinite number

of gears. Transmissions with more gears allow the engine to run at its most efficient speed more often, improving fuel economy.

### Improved Aerodynamics

Reducing a vehicle's aerodynamic drag (wind resistance) improves fuel economy, especially at higher speeds. Many manufacturers are improving aerodynamics by refining vehicle shapes or by employing external moving parts such as "shutters" that close off the grill, allowing air to flow smoothly around the vehicle instead of into the engine compartment, where it produces more drag.

### Lighter Vehicles

Reducing vehicle weight improves fuel economy, so manufacturers are beginning to redesign vehicles to weigh less while maintaining performance and safety. For example, replacing a steel body with one made from a lighter-weight material, such as aluminum, can reduce vehicle weight by hundreds of pounds.

## IMPROVE YOUR FUEL ECONOMY

### Drive More Efficiently

- Aggressive driving (speeding and rapid acceleration/braking) can lower your gas mileage by as much as 33% at highway speeds and 5% around town.

Driver feedback devices can help you drive more efficiently, improving fuel economy by up to 10%.

- Observe the speed limit. Each 5 MPH you drive over 60 MPH can reduce your fuel economy by 7%. For a personalized estimate of the effect of speeding on your fuel economy, visit [www.fueleconomy.gov](http://www.fueleconomy.gov).

- Avoid idling. Idling gets 0 miles per gallon and costs as much as \$0.03 per minute.

- Using cruise control on the highway helps you maintain a constant speed and, in most cases, will save gas.

### Keep Your Car in Shape

- Fixing a car that is noticeably out of tune can improve your gas mileage by about 4%.
- Keeping tires inflated to the recommended pressure and using the recommended grade of motor oil can improve fuel economy by up to 5%.

The manufacturer's recommended tire pressure can be found on the tire information placard and/or vehicle certification label located on the vehicle door edge, doorpost, glove-box door, or inside the trunk lid.

- Keep your tires aligned and balanced.
- Replacing a clogged air filter can improve gas mileage on older cars with carbureted engines.

### Plan and Combine Trips

- A warmed-up engine is more fuel-efficient than a cold one. Many short trips taken from a cold start can use twice as much fuel as one multipurpose trip covering the same distance.

**Note:** Letting your car idle to warm up doesn't help your fuel economy; it actually uses more fuel and creates more pollution.

### Other Solutions

- Avoid carrying unneeded items. An extra 100 pounds can decrease fuel economy by about 1%.
- Avoid carrying cargo on your roof. A large, blunt roof-top cargo box, for example, can reduce fuel economy by 2%–8% in city driving, 6%–17% on the highway, and 10%–25% at Interstate speeds (65 mph to 75 mph).

Rear-mount cargo boxes or trays reduce fuel economy by much less—1%–2% in city driving and 1%–5% on the highway.

- Use the "economy mode" feature if your vehicle has one.

For more tips on improving fuel economy, such as cold-weather tips, hot-weather tips, and tips for hybrids, plug-in hybrids, and all-electric vehicles, visit [www.fueleconomy.gov](http://www.fueleconomy.gov).

## FUEL ECONOMY LEADERS

Listed below are vehicles with the highest fuel economy in the most popular classes. For each vehicle class, we list the most fuel-efficient plug-in hybrid (PHEV) or all-electric (EV) and the most fuel-efficient conventional vehicle. Rankings are based on combined city and highway fuel economy estimates, which assume 55% city driving and 45% highway driving. Please note that many vehicle models come in a range of engine sizes and trim lines, resulting in different fuel economy values. If there is only one vehicle in a class, we do not list a fuel economy leader.

|                                        | Trans Type /<br>Speeds | Eng Size /<br>Cylinders | MPG<br>Combined |

\* This is an electric vehicle. Since electricity is not measured in gallons, a conversion factor is used to translate the fuel economy into miles per gallon of gasoline equivalent (MPGe).

## 2016 MODEL YEAR VEHICLES

This section contains the fuel economy values for 2016 model year vehicles. Additional information for alternative fuel vehicles can be found on pages 31–35 and 38–40. Alternative fuel vehicles are highlighted with a light blue bar, and those that can use two kinds of fuel, such as flexible fuel vehicles, have an entry for each fuel type. The most fuel-efficient vehicles per class are listed in blue boldface type and marked with a blue pointer (▶).

| Manufacturer<br>Model<br>Configuration<br>(trans, eng size, cyl) | MPG  |          | Annual<br>Fuel<br>Cost | GHG<br>Rating | Notes |
|------------------------------------------------------------------|------|----------|------------------------|---------------|-------|
|                                                                  | Comb | City/Hwy |                        |               |       |

#### ABBREVIATIONS:

▶..... Highest MPG in Class

2WD..... Two-Wheel Drive

4WD..... Four-Wheel Drive

A..... Automatic Transmission

A-S..... Automatic Transmission-Select Shift

AM..... Automated Manual

AM-S..... Automated Manual-Selectable

AV..... Continuously Variable Transmission

AV-S..... Continuously Variable Transmission with Select Shift

AWD..... All-Wheel Drive

City..... MPG on City Test Procedure

Cyl..... Cylinders

Comb..... Combined

D..... Ultra-Low Sulfur Diesel

E85..... 85% Ethanol/15% Gasoline

Eng Size..... Engine Volume in Liters

EV..... Electric Vehicle

FCV..... Fuel Cell Vehicle

FFV..... Flexible Fuel Vehicle

FWD..... Front-Wheel Drive

Gas..... Regular Gasoline

GHG..... Greenhouse Gas

H..... Hydrogen

HEV..... Hybrid Electric Vehicle

Hwy..... MPG on Highway Test Procedure

i-ELOOP..... Mazda Optional Technology Package

Li-Ion..... Lithium Ion

LWB..... Long Wheel Base

M..... Manual Transmission

Mid..... Midgrade Gasoline

Mode..... Multimode Transmission

MPG..... Miles per Gallon

NA..... Not Available

Ni-MH..... Nickel-Metal Hydride

ORP..... Off-Road Package

P..... Premium Gasoline Recommended

PHEV..... Plug-in Hybrid Electric Vehicle

PR..... Premium Gasoline Required

PT4WD..... Part-time 4WD

PZEV..... Partial Zero-Emission Vehicles

S..... Supercharger

SS..... Stop-Start Technology

SWB..... Short Wheelbase

T..... Turbocharger

Tax..... Subject to Gas Guzzler Tax

Trans..... Transmission

## DIESEL VEHICLES

Diesel-powered vehicles are typically more fuel efficient than comparable vehicles powered by gasoline. Diesel engines are inherently more energy-efficient, and diesel fuel contains roughly 10%–15% more energy per gallon than gasoline. In addition, new advances in diesel engine technology have improved performance, reduced engine noise and fuel odor, and decreased emissions of harmful air pollutants. Ultra-low sulfur diesel fuels also help reduce emissions from these vehicles.

Annual fuel costs below are estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and a diesel fuel cost of \$3.52 per gallon.

| Manufacturer<br>Model<br>Configuration<br>(trans, eng size, cyl) | MPG  |          | Annual<br>Fuel<br>Cost | GHG<br>Rating | Notes |

## ALL-ELECTRIC VEHICLES

All-electric vehicles (EVs) are propelled by one or more electric motors powered by rechargeable battery packs. EVs are energy-efficient and reduce our dependence on petroleum since electricity is produced from domestic resources. They emit no tailpipe pollutants, although the power plant producing the electricity may emit pollution.

Electric motors have several performance benefits. They are quiet, have instant torque for quick acceleration, and require less maintenance than internal combustion engines.

Current EVs have a shorter driving range than gasoline or hybrid vehicles, and their range is more sensitive to driving style, driving conditions, and accessory use. Fully recharging the battery pack can take several hours—though a "fast charge" to 80%

capacity may take as little as 30 minutes. Charging options outside the home are expanding with more than 200 employers offering charging at work and more than 10,000 public charging stations available. EVs are also more expensive than comparable conventional vehicles and hybrids due to the cost of the large battery packs. However, as manufacturers continue to improve the driving range and reduce the cost of these vehicles, they are becoming more practical and affordable for a wider range of consumers.

A federal income tax credit of up to \$7,500 is currently available to consumers purchasing a qualifying EV. Visit [www.fueleconomy.gov](http://www.fueleconomy.gov) for additional information on EVs, including tax incentives.

## COMPRESSED NATURAL GAS VEHICLES

Compressed natural gas (CNG) vehicles can produce fewer greenhouse gas pollutants and reduce our dependence on petroleum. CNG fuel is normally dispensed in “equivalent gallons,” where one gasoline gallon equivalent is equal to 121.5 standard cubic feet of natural gas. Bi-fuel CNG vehicles can operate on either gasoline or CNG. For bi-fuel vehicles, the fuel economy, annual fuel cost, and driving range values are shown for both gasoline and CNG.

Annual fuel costs are estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and an average fuel cost of \$1.55 per gallon equivalent for CNG and \$3.05 per gallon for regular gasoline.

| Model                | Transmission Type/Speeds | Engine Size/ Cylinders | Fuel     | MPGe Comb/City/Hwy | Annual Fuel Cost | GHG Rating | Driving Range (miles) |

## FUEL CELL VEHICLES

Though not yet available for the mass market, a limited number fuel cell vehicles (FCVs) will be available for lease and sale in select regions of the country, mostly in California, in 2015–16. FCVs are propelled by electric motors powered by fuel cells, which produce electricity from the chemical energy of hydrogen. Fuel cell technology is more efficient than internal combustion engines and environmentally cleaner—the only by-product of a hydrogen fuel cell vehicle is water. However, several challenges must be overcome before FCVs are mass-marketed and sold across the country. For more information about FCVs, visit [www.fueleconomy.gov](http://www.fueleconomy.gov) and the Fuel Cell Technologies Program website at [www.energy.gov/eere/fuelcells/fuel-cell-technologies-office/](http://www.energy.gov/eere/fuelcells/fuel-cell-technologies-office/).

## PLUG-IN HYBRID ELECTRIC VEHICLES

Plug-in hybrid electric vehicles (PHEVs) are hybrid-electric vehicles with high-capacity batteries that can be charged both by regenerative braking and by plugging them into an electrical outlet or charging station. Plug-in hybrids can store enough electricity from the power grid to significantly reduce their petroleum consumption under typical driving conditions.

There are two basic plug-in hybrid configurations:

- **Series PHEVs, also called Extended Range Electric Vehicles (EREVs).** The electric motor on these vehicles is the only power source that turns the wheels; the gasoline engine only generates electricity. Series PHEVs can run solely on electricity until the battery needs to be recharged. The gasoline engine will then generate the electricity needed to power the electric motor. For short trips, these vehicles may not use any gasoline.
- **Parallel or Blended PHEVs.** Both the engine and electric motor are mechanically connected to the wheels, and both may propel the vehicle. The vehicle may operate using both electricity and gasoline at the same time, using electricity only, or using gasoline only.

Plug-in hybrids also have different battery capacities, allowing some to travel farther on electricity than others. PHEV fuel economy, like that of EVs and regular hybrids, can be sensitive to driving style, driving conditions, and accessory use. When operating in pure electric mode, PHEVs emit no tailpipe pollutants, although the power plant producing the electricity may emit pollution.

Charging a PHEV's battery typically takes several hours. They can be charge at home or at an increasing number of workplaces or public locations. However, PHEVs don't have to be plugged in to be driven. They can be fueled solely with gasoline, like a conventional hybrid, but they will not achieve maximum range or fuel economy without charging.

Plug-in hybrids use less petroleum and cost less to fuel than conventional hybrids, but they are more expensive to purchase.

A federal income tax credit of up to \$7,500 is currently available to consumers purchasing a qualifying plug-in hybrid. Visit [www.fueleconomy.gov](http://www.fueleconomy.gov) for additional information on PHEVs, including tax incentives.

\* Total range includes operation on both electricity and gasoline and is rounded to the nearest 10 miles.

† Alternating current induction motor

‡ Three phase alternating current motor

§ Interior-permanent magnet synchronous motor

\*\* Direct current permanent magnet brushless motor

†† This vehicle did not use any gasoline for charge-depleting (all electric) operation during EPA city and highway tests. However, depending on how you drive the vehicle, you may use both gasoline and electricity during charge-depleting (all electric) operation following a full charge.

‡‡ Direct current brushless motor

## HYBRID ELECTRIC VEHICLES

It's no coincidence that some of the most fuel-efficient vehicles for the 2016 model year are hybrid electric vehicles (HEVs). Hybrids combine the best features of the internal combustion engine with an electric motor and can significantly improve fuel economy.

Hybrids are primarily propelled by an internal combustion engine, just like conventional vehicles. However, they also convert energy normally wasted during coasting and braking into electricity, which is stored in a battery until needed by the electric motor. The electric motor assists the engine when accelerating or hill climbing and at low speeds, where internal combustion engines are least efficient. Unlike plug-in hybrids, conventional hybrids cannot be plugged into an external source of electricity to be recharged or run on electricity for any substantial distance. Instead, gasoline and regenerative braking provide all of the vehicle's energy.

Annual fuel cost is estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and a fuel cost of \$3.05 per gallon for regular unleaded gasoline or \$3.96 for premium gasoline.

| Manufacturer<br>Model<br>Configuration<br>(trans, eng size, cyl) | MPG  |          | Annual<br>Fuel<br>Cost | GHG<br>Rating | Battery<br>Type |

## ETHANOL FLEXIBLE FUEL VEHICLES

Ethanol flexible fuel vehicles (FFVs) are designed by the original manufacturer to operate on gasoline, E85, or any mixture of the two fuels. Annual fuel cost is estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and an average fuel cost of \$2.99 per gallon for E85, \$3.05 per gallon for regular unleaded gasoline, and \$3.96 per gallon for premium unleaded gasoline. The price of ethanol is highly variable from region to region; it is typically lower in the Midwestern United States and higher in other areas. Therefore, actual consumer experience may differ significantly from the annual fuel cost estimate presented here.

Fuel economy and driving range values are shown for both gasoline and E85. When operating your FFV on mixtures of gasoline and E85, such as when alternating between using these fuels, your driving range and fuel economy values will be somewhere between those listed for the two fuels, depending on the actual percentage of gasoline and E85 in the tank.

## GETTING TO KNOW THE NEW FUEL ECONOMY AND ENVIRONMENT LABEL

EPA recently redesigned the Fuel Economy and Environment labels that must be affixed to new vehicles starting with the 2013 model year. The example below shows a sample label for a gasoline vehicle. Slightly different designs are used for flexible-fuel vehicles, electric vehicles, and plug-in hybrids. For more in-depth descriptions of label information for all vehicle types, visit [www.fueleconomy.gov](http://www.fueleconomy.gov).
