## CRUZE PUTS SAFETY FIRST. THE SAME WAY YOU DO.

### **LOW SPEED FORWARD AUTOMATIC BRAKING.**

If the vehicle is travelling at a low speed and the system detects that a front-end collision situation is imminent while following a detected vehicle and the driver has not already applied the brakes, the system can automatically apply the brakes to help reduce the collision's severity. The system may even help avoid a collision at very low speeds. Available on Premier.

### **FORWARD COLLISION ALERT AND FOLLOWING DISTANCE INDICATOR.**

The Forward Collision Alert feature is designed to monitor how close your vehicle is to a detected vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it is designed to alert the driver to a potential crash. The available Following Distance Indicator can provide the driver with the following time to a moving vehicle detected in front of them. Available on Premier.

### **LANE KEEP ASSIST WITH LANE DEPARTURE WARNING.**

This camera-based system monitors road lines and can provide gentle steering wheel turns (and Lane Departure Warning alerts if necessary) to help drivers avoid unintentionally drifting out of their detected lane when they are not actively steering and their turn signal is not activated. Available on Premier.

### **AVAILABLE LANE CHANGE ALERT WITH SIDE BLIND ZONE ALERT.**

Radar sensors in the rear corners of the vehicle are designed to help detect fast-approaching vehicles in the adjacent lanes as well as moving vehicles in the side mirror blind zones. Amber icons in the exterior mirrors indicate a vehicle's presence.

**AVAILABLE REAR CROSS TRAFFIC ALERT.** Using radar sensors, this available feature is designed to alert the driver to crossing vehicles behind Cruze when in Reverse. Audible warnings, as well as visual alerts on the Rear Vision Camera screen, are triggered if approaching vehicles are detected.

**REAR VISION CAMERA.** When the transmission is in Reverse, the Rear Vision Camera with dynamic guiding lines allows the driver to view objects directly behind the vehicle via the screen in the centre stack. So it's easier to back up or park.

**REAR PARK ASSIST.** This available feature is designed to alert the driver, when in Reverse, by sounding an audible alert and providing visual indication on the Rear Vision Camera display when it detects certain stationary objects in close proximity behind the vehicle.

**INTELLIBEAM HEADLAMPS.** When oncoming headlamps are sensed or when tail lamps are detected in front of the vehicle, the available IntelliBeam® high beam assist intuitively adjusts between low and high beams. Available on Premier.

*Safety starts with you. Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner's Manual for more important feature limitations and information.*
