

Reynolds' Subaru is committed to making a positive impact on our community

Some of our eco-friendly efforts at work:

- **Sunpower Solar panels** installed
- High speed automatic **express service door** to reduce heating & cooling needs
- **EV charging station**
- **Low flow faucets** use 25-60% less water
- **Day light harvesting lights**
- Electric **hand dryers** in restrooms
- **Waste Oil Burn Furnace** and we purchase offspec oil if necessary to burn in long winters when our use outweighs production
- **Programmable thermostats**, every degree of temperature control reduces energy loss by 2%
- Our guests receive a Reynolds reusable **water bottle** and **shopping bag**
- Every employee has a **Yeti hot/cold cup** to reduce hot and cold cup use.
- Interior **living plants** for better indoor air quality
- **Occupancy sensors** reduce electrical load by 45%
- Waste water from detail shop and marina is taken off site for **proper recycling**
- **Coffee cups, lids, all paper, cardboard** are recycled
- **LED exit signs**: each light emitting diode sign uses just 44kwh per year to operate
- **Drought tolerant plants** requiring minimal watering are planted externally
- **Wooden pallets** are often recycled to schools and non-profits for reuse
- **Upcycle packaging and cardboard** to neighboring businesses
