

A PERFECT FIT FOR ICE AND EV'S:

# THE E-FLOOR

EASY. EFFICIENT. EV READY.

Ranger Design's unique E-Floor is designed to offer the best fit for both your electric or gas powered vehicles.

## EV-FRIENDLY

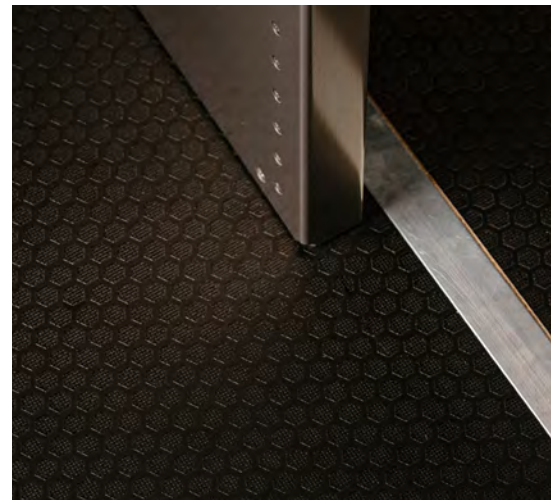

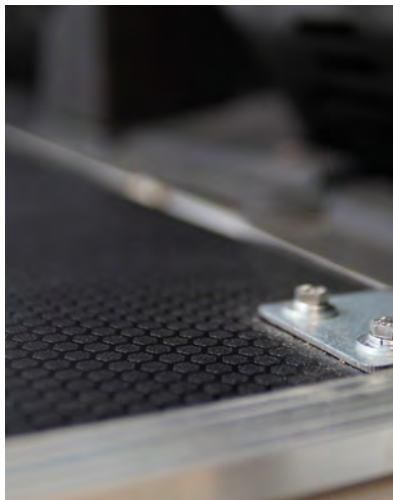

Ranger Design's floor is a new concept that installs directly into the D-rings of the van. This prevents accidentally drilling into any wiring just below the surface of your van's OEM floor, making it the perfect solution for EV's.

## EASY INSTALL

The install of the E-Floor is quick (half the time of any other floor) and simple. This option also ensures a great resale value for your vehicle in the future, as the install leaves no permanent damage.
