

2015 Golf GTI

Das Auto.

Live faster.

The Golf GTI is fast. The kind of fast you're really going to notice. And it's not just the 210 hp and 258 lb-ft of torque generated 2.0 TSI engine that will make you sit up and take notice. The new, advanced MQB platform also makes the Golf GTI lighter, incredibly fuel-efficient, and really fun to drive. Welcome to the fast lane.

Initiate warp speed.

A blur when it gets going, the Golf GTI even looks fast when it's standing still. The classic red accents – red interior stitching and bright-red brake calipers – combine with the new available 18" Austin alloy wheels and LED fog lights for an aggressive look that's unmistakably GTI. And with a variable cargo load floor that can fit just about anything, it's practical, too. It's not science-fiction; it's the new Golf GTI.

*Delayed introduction.

Think Blue. It's how we put more thought into what and how you drive.

Fuel Consumption	Engine	City L/100 km	Highway L/100 km
Manual	2.0 TSI	9.4	6.9
Automatic DSG	2.0 TSI	9.5	7.2

DSG – A definite shift for the better, DSG gives you the convenience of an automatic with the performance and efficiency of a manual. Here's how it works: DSG is managed by dual electronically controlled clutches, so not only do you shift faster, you also get enhanced acceleration and reduced fuel consumption. In fact, thanks to DSG, each shift takes less than 4/100ths of a second. And if you're the manual type, a quick flip of the Tiptronic® function lets you shift into something a little sportier.

TSI – TSI brings together the power of FSI® direct fuel injection with the boost of a turbocharger. The end result? An ultra-efficient engine that provides maximum torque from 1,600 to 4,200 rpm, gives you outstanding performance through a wide range of speeds, power when you really need it, ultra-low fuel consumption and, ultimately, lower CO₂ emissions.

A warm engine – a cool way to save. Your engine uses the most fuel when cold. So if you're always driving short distances, you're not optimizing usage. If possible, try combining shorter trips. You'll consume less fuel and save more money. Just one way that we can all Think Blue.

Think Blue.
