Make your heart race with Genuine Subaru Performance Parts

If you're looking for excitement, you've come to the right catalog! Inside you'll find all the new ways to enhance the performance, endurance and appearance of your Subaru. These Genuine Subaru Performance Parts are all custom engineered to fit your specific vehicle. Which means you can customize, without compromising the integrity of your Subaru. Now, that's exciting.

About Performance Parts.

Developed under the umbrella of the "total tuning" concept, STI Performance Parts are created in close cooperation with the development team of STI (Subaru Tecnica International), a 100% wholly owned subsidiary of Fuji Heavy Industries Ltd. (FHI). Unlike generic performance parts, STI Performance Parts reflect the synergy of STI and FHI, working together to take performance to a new level. Real time performance parts data gleaned from the WRC has been fed back to the STI development group, which uses this knowledge to produce high quality products designed specifically for the unique power train requirements of the Subaru.

Parts not marked with asterisk(s) are covered by the Limited Warranty for Genuine Subaru Replacement Parts and Accessories. See dealer for complete warranty details.

* Parts with one asterisk are covered by the Parts Only Limited Warranty for Select Genuine Subaru Performance Parts (Labor Excluded).
Parts intended for off-highway application only. May bring vehicle out of compliance with safety/emissions standards. Can only be lawfully installed by end user.
See dealer for complete warranty details.

** Parts with 2 asterisks sold "as is" without any warranty coverage. Intended for off-highway application only. May bring vehicle out of compliance with safety/emissions standards. Can only be lawfully installed by end user. See dealer for complete warranty details.

Performance Exhaust System

New! Mounted behind the catalytic converter, the STI Performance Exhaust System provides a smooth mandrel bend construction to help reduce exhaust flow restrictions, allowing the engine to "breathe" more efficiently. The exhaust systems include a free-flowing center pipe after the catalytic converter than splits into two pipes and mufflers with engraved STI tips.

SPT Legacy 2.5GT Sedan Performance Exhaust System

Cat-back exhaust system is manufactured of T304 stainless steel. Smooth mandrel bend construction helps to minimize back pressure, improve exhaust flow and produce a rich mellow tone. The exhaust system includes a 3-inch intermediate pipe, 3-inch rear y-pipe that splits to two 2-1/4-inch polished pipes and two polished mufflers with SPT engraved tips.

Legacy GT Sedan & spec.B (2005-2009): **SOA3881110**

SPT Performance Exhaust System

These exhaust systems feature full stainless steel construction with smooth mandrel bands for low restriction and that famous boxer engine sound. All systems incorporate optimized tubing diameters and exhaust tips that are polished and etched with the SPT logo.

SPT High Flow Air Intake

The SPT High Flow Air Intake is constructed of 319 diecast aluminum, manufactured to ensure the smoothest high flowing bends. Each system includes a silicone-reinforced boot, anti-vibration mounting system, stainless steel t-bolt clamps, and a SPT 4-layer cotton gauze filter with a built in velocity stack for smooth air flow. The intake is coated in new gunmetal gray-textured powder-coat finish. Professionally dyno tested and when combined with the SPT Heat Shield and SPT Performance Exhaust System, produces up to 30hp and 20 lb-ft of torque on a stock 2007 STI, up to 10hp and 17 lb-ft of torque on a stock 2007 WRX, and up to 30hp and 30lb-ft of torque on a stock 2007 Legacy GT Sedan when measured at the wheel. Installation of High Flow Air Intake System will result in increased turbocharger and diverter valve air flow sounds during operations. This condition is indicative of normal operation.

STI Air Cleaner Element*

Drop-in replacement air cleaner element allows a higher volume of air flow versus the stock air filter. Paper element and steel mesh construction does not require oiling. Replaces standard element 16546AA020.

Impreza WRX (2002-2007) & WRX STI (2004-2007): **ST165464S000**

SPT Heat Shield

The SPT Heat Shield helps ensure that the SPT Intake is able to supply the engine with cool air, which reduces the loss of power that comes from a heated intake charge. Cooler air is drawn from inside the passenger front wheel well and behind the headlight - not from the hotter areas surrounding the turbocharger, engine and radiator. Unlike a traditional cold-air intake, which places the filter element as low as possible in the vehicle, this setup helps to supply cool air, limiting the risks of water ingestion.

STI Performance Suspension Components†*

Adjustable Struts and Springs:

Inverted strut and spring design with variable height adjustment. Includes a 4-position strut dampening adjustment on front and rear struts. Strut diameter is increased from 22mm to 39mm on 2.5RS and WRX (equal diameter on the STI model). Springs initially lower body approximately 10mm on 2.5RS and WRX, 20mm on STI model, and may be adjusted an additional 30mm.

STI Inverted Adjustable Struts and Springs†*

Inverted strut and fixed spring design lowers the vehicle approximately 15mm. Front spring stiffness is increased 35% over stock, and 30% over stock on the rear springs. Front and rear struts include a 4-position strut dampening adjustment which may be adjusted to the dampening force of a stock WRX, to harder than a stock STI suspension. Struts are designed exclusively for the 2005-2007 Impreza WRX STI models.

SPT Performance Spring Set*

Performance Spring Set lowers the WRX Sedan stance approximately 1.4" front, 1.2" rear, resulting in a lower center of gravity, which improves handling performance and vehicle responsiveness. A lower center of gravity helps reduce squat during acceleration, body roll when cornering and excessive nose-dive under braking. Kit includes 2 front and 2 rear suspension springs.

Impreza WRX Sedan (2002-2003): **SOA855Z1200**

STI Strut Mounts – Front

Harder rubber construction over stock mounts allows for less strut movement and more responsive steering during extreme driving conditions.
