JUKE[®]

Nissan. Innovation that excites.[™]

NISSAN JUKE[®]

Shouldn't you drive something you love? Absolutely. And that's what inspires our innovation. We look at every part of your drive and ask how can we make this better, smarter and more fun. So when you get in your new JUKE, you'll feel how exciting the answers can be:

I-CON. With JUKE's available Integrated Control (I-CON) system, you dial in Sport, Normal or Eco mode and JUKE obeys, adjusting steering feel, transmission gearing and throttle response.

Torque Vectoring AWD. Unlike most systems, JUKE's available advanced AWD system adjusts power side-to-side on the rear wheels, giving you grin-inducing grip around turns.

Turbo power. JUKE's turbocharged Direct Injection Gasoline (DIG[™]) engine gives you the power of a much larger engine while still racking up to 32 MPG highway.¹

Info-tainment. Show meets go with available navigation with real-time traffic updates, a USB/iPod[®] interface, Bluetooth,² and Nissan Intelligent Key[®] with Push Button Ignition.^{2,3,4,5}

BUILT TO THRILL.

THE FEELING OF INNOVATION.

Kick convention to the curb. JUKE® is the leader of an all-new breed: the Turbocharged Sport Cross. The intentions are clear. Ride high, stand out, and move quickly. All while customizing your ride on the go. The turbocharged engine delivers serious boost when you need it and sips fuel when you don't, while an available innovative All-Wheel Drive system turns power into grip. Everything you thought a vehicle was just got turned on its head, courtesy of the 2013 JUKE. Nissan. Innovation that excites.™

Nissan JUKE SL AWD Midnight Edition shown in Pearl White.

**A NOD FROM
THOSE THAT GET IT
IS ALL YOU NEED.**

Nissan JUKE SL AWD shown in Gun Metallic.

**FINDING THE EDGE IN
EVERY DETAIL.**

SEEING A LITTLE RED EVERY NOW AND THEN.

It's good to get the adrenaline flowing. Everything is more exciting, more alive. In JUKE, you'll find a pulse-raising center console inspired by the radical lines of an Italian sport bike. So mount up and ride. No helmet required.

**WHY JUST CORNER
WHEN YOU CAN VECTOR?**

Instead of traditional All-Wheel Drive (AWD) systems that only distribute power from front to back, available torque vectoring AWD also adjusts power side-to-side to the rear wheels. In a turn, this means the outside rear wheel can be given more power, helping JUKE rotate into the curve and accelerate out, or should we say, vector like you never have before.

Nissan JUKE SL AWD shown in Gun Metallic.

THE FEELING YOU'RE ON A MISSION.

Nissan JUKE SL AWD shown in Sapphire Black.

INNOVATION THAT'S GOOD TO GO.

You've got a plan. JUKE's here to see that it gets done. Need to tackle some mountain curves? Hit the Sport mode button on the innovative Integrated Control (I-CON) system. Lumbering semi ahead? Pass it in seconds with the Direct Injection Gasoline (DIG™) turbo engine. Looking to make a first impression? With a one-of-a-kind interior that melds car and motorcycle into one, that's a given. Surprised? Turn the page and find out even more.

I-CON SYSTEM

Scan this with your QR code-reader app to see a short video on JUKE's I-CON system. Or go to bit.ly/jukeicon

ADAPT AT WILL.

Like a great smartphone, JUKE's Integrated Control (I-CON) system puts everything you need in one place. Tell JUKE what kind of mood you're in, and it serves up a custom-tailored drive. All your climate control functions are there too. I-CON even lets you know how you're doing, with cool displays for all the different functions you can call up.

Torque It. Boost It. Save It – In JUKE, it's up to you. Drive in Normal mode for the best combination of performance and efficiency. Want to up the ante? Lock in Sport mode and steering feel, transmission gearing and throttle response quickly adjust to make every curve count. And when it's time to slow things down, hit the Eco mode button and get the most out of every drop of fuel.

Shown in D-Mode Interface

Shown in Climate Interface

Double Agent – I-CON puts you in charge of your ride style and interior comfort. In D-Mode, the system gives you the ability to rapidly adapt to changing driving conditions. With a push of the Climate button, I-CON switches displays and now becomes your control center for all things comfort.

Get the Stats – Count on the drive computer to keep you in the know. Loaded with information about everything from maximum G-force to total trip miles to your daily fuel economy record. The more you know, the better you drive.

MOVE ON COMMAND.

Sometimes you just get stuck behind the wrong people. Passing lane ahead! Tap into the turbo and leave them in the rearview mirror. And when it's time to get a grip, count on JUKE's available torque vectoring All-Wheel Drive system to make sure all that power gets to the pavement.

1.6-L Direct Injection Gasoline (DIG™) Turbo Engine – If you could design an engine to provide the ideal balance of efficiency and power, this would be it. Turbo boost gives you more than enough passing power when you need it, while the compact engine design and advanced direct injection deliver fuel-sipping economy when you don't.

Primary and Secondary Fuel Injection – Two levels of fuel injection give you the perfect one-two punch. By spraying fuel directly into the combustion chamber twice before ignition, the combustion pattern is optimized. Meaning greater efficiency, torque and power. Now, that's a knockout.

CVT (Continuously Variable Transmission) with Sport Mode – Smooth as butter and fun to drive. Unlike traditional automatic transmissions, JUKE's CVT transmission eliminates the need for gear-hunting and delivers a seamless wave of power. In case you miss the feeling of gears, you can engage Sport mode and bring it right back. Of course, a manual transmission is still available for the die-hard enthusiast.

Torque Vectoring AWD – Taking on a twisty mountain road? Go for it. Need to tackle a sharp highway on-ramp? Done. JUKE's available innovative AWD gives you the handling response you deserve. Unlike traditional AWD systems that only distribute power front to back, torque vectoring AWD can also adjust power side to side on the rear wheels, helping provide solid grip through the turn.

AWD Display – A digital readout between the gauges provides real-time AWD feedback for all four corners.

PUREDRIIVE™ – The 2013 JUKE wears the PUREDRIIVE™ badge, meaning it meets or exceeds the industry-average US Federal CAFE standards for model-year 2016. The PUREDRIIVE initiative is just one aspect of Nissan's commitment to developing more environmentally friendly transportation for all of us to enjoy.¹

DIG TURBO

Scan this with your QR code-reader app to see a short video on JUKE's DIG turbo engine. Or go to bit.ly/digturbo

AWD

Scan this with your QR code-reader app to see a short video on JUKE's torque vectoring AWD. Or go to bit.ly/jukeawd

PERFORMANCE

¹Adoption criteria above are based upon US Federal CAFE standards as of July 2011 for MY 2016. Federal standards subject to change by US government.

NAVIGATION

Scan this with your QR code-reader app to see a short video on JUKE's incredibly smart navigation system. Or go to bit.ly/NissanNavigation

TAKE CONTROL OF THE SITUATION.

Make easy work out of finding that new club. Dial in your favorite artist. Or call ahead, with both hands on the wheel. In JUKE, your life never misses a beat.

Nissan Navigation System – JUKE's available advanced navigation system gives you all the tools to make every trip a snap. Turn-by-turn Voice Guidance combined with available real-time traffic reports from NavTraffic get you around gridlock and to your destination on time.^{1,2}

A. **RearView Monitor** – Need to squeeze into a tight parking spot? You got it. JUKE's available RearView Monitor helps you see what's directly behind you.³

B. **Nissan Intelligent Key®** – Never fumble with keys again. Just leave the available Nissan Intelligent Key® in your pocket or purse. As you walk up to the vehicle, it senses the key and allows you to unlock the door with a tap of a button on the door handle. Once inside, use the Push Button Ignition to start the engine.

C. **Audio Inputs** – All your music is just a plug away. JUKE features an available USB input that is ideal for an iPod® or playing MP3s off a thumb drive. And in case you have any music you want to play from a different source, there's an auxiliary audio input.^{4,5}

D. **Bluetooth® Hands-free Phone System** – Keep up those connections on the move. With standard next-generation Bluetooth® technology on hand, JUKE will store your phone's address book so you can use the voice-activation feature to make calls by name.⁶

E. **Upgraded Audio** – Lock in that playlist and turn up the volume. The new, optional Rockford Fosgate EcoPUNCH™ Premium Audio System will rock you while consuming less juice than a conventional amplifier system. EcoPUNCH integrates six high-efficiency speakers with a powerful 8-inch long-throw sub-woofer to produce a dynamic, hard-hitting signature sound. And with the standard MP3 CD player, your entire CD collection can come along for the ride.

¹Never program while driving. GPS mapping may not be detailed in all areas or reflect current road regulations. ²SiriusXM Satellite Radio and NavTraffic require subscriptions sold separately after trial period. A

B

TRUST IN YOUR PRACTICAL SIDE.

When another late night gig is in order, JUKE stands ready with multiple storage options to make it a success. Add to that plenty of seat configurations, so your crew doesn't have to miss out. Then, drop in a solid lineup of advanced safety features. This is definitely going to be a night to remember.

C

A. Cargo Space. Drop the seats down and load it up. With the rear seats folded flat, you get a cavernous 35.9 cubic feet of cargo space. Now you have no excuse not to bring everything but the kitchen sink.¹

B. Clever Storage. Check under the rear cargo area floor and you'll find a secret storage stash. It's just the right size to store all your roadside safety equipment or anything you want to keep out of sight.^{1,2}

C. Six Standard Air Bags. Six standard air bags wrap you in safety. Two dual-stage supplemental front air bags equipped with seat belt sensors and an occupant-classification sensor. Supplemental air bags for side-impact protection are built into each front seat. And two roof-mounted curtain side-impact supplemental air bags to help provide head protection for both rows of outboard occupants.³

Active Head Restraints. Front-seat Active Head Restraints help reduce the chance of whiplash injuries to you and your front passenger by moving up and forward during certain rear-end collisions.

VDC/TCS/ABS. Standard Vehicle Dynamic Control (VDC) helps the driver maintain directional control under certain conditions.⁴ Get a grip with standard Traction Control System (TCS). It senses when a drive wheel starts to slip and reduces engine power or applies

brake pressure to help restore grip. And maintain steering control when stopping using JUKE's Anti-lock Braking System (ABS).

Brake Override Technology. Like every Nissan since 2005, JUKE comes standard with Brake Override Technology. It's designed to help slow down your vehicle and bring it to a safe stop in an emergency by overriding accelerator input and reducing engine power when the accelerator and brake pedals are applied simultaneously.

snug4kids™ Nissan safety engineers have dedicated thousands of hours to evaluating hundreds of child restraints in Nissan vehicles. The result: An industry first, The Snug Kids Child Safety Seat Fit Guide. This guide lists child seats that fit the rear seats of Nissan vehicles, as well as offers invaluable tips on correct installation. Look for the latest Fit Guide at NissanUSA.com/SnugKids.

¹Cargo and load capacity limited by weight and distribution. Cargo shown for demonstration purposes only. Always secure all cargo. ²FWD models only. ³Air bags are only a supplemental restraint system; always wear your seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. Also, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Air bags will only inflate in certain accidents. See your Owner's Manual for more details. Inflated air bags shown for illustration purposes only; actual coverage area may differ. Air bags deflate after deployment. ⁴VDC, which should remain on when driving except when freeing the vehicle from mud or snow, cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. Always drive safely.

Scan this with your QR code-reader app to see a short video on how Snug Kids helps you find the right CRS for your Nissan. Or go to bit.ly/NissanSnugKids

Buying and owning a Nissan is like driving one: quick, convenient, confidence-inspiring.

Nissan Motor Acceptance Corporation. Whether you're buying or leasing, you'll find attractive rates and flexible terms to make your purchase more accessible.

New Vehicle Limited Warranties. Protection for your new Nissan includes 3-year/36,000-mile basic coverage and 5-year/60,000-mile powertrain coverage. Terms, conditions and exclusions apply. See Warranty Information Booklet for complete details.

Security+Plus.[®] For additional peace of mind, a variety of extended service plans lets you tailor the coverage to your driving habits.

Maintenance+Plus.[®] This extended plan ensures your Nissan will receive up to 17 different services and over 33 different inspection items at each visit, using the most up-to-date diagnostic equipment available.

Genuine Nissan Parts. When it comes time for service, any necessary replacement parts will be made using Genuine Nissan new or remanufactured parts, or Nissan-approved parts. And they're the only parts to carry Nissan's factory-backed limited warranty.

Nissan's philosophy toward the environment, "Seeking a symbiosis of people, vehicles and nature," describes our ideal for a sustainable mobile society, now and in the future. We launched the Nissan Green Program with specific objectives to realize this goal, and we are pursuing it energetically. For more information, log on to NissanUSA.com/green
