2021 4RUNNER

Choose your own adventure.

The best adventures in life aren't found on a map.

Toyota trucks are made for the kinds of conditions you'll find in Canada. They have been tested all over the world, in some of the toughest environments imaginable. That spirit continues with the 2021 4Runner. Even on uncharted roads, the 4Runner performs with the confidence of an SUV that's driven there a hundred times over. With several unique models to choose from, including the stylish SR5, Venture, Limited and Nightshade Edition, or the performance-tuned Trail, TRD Off Road, or TRD Pro, there's a model suited for every type of explorer – the challenge is choosing what kind of adventure you want to create today.

2021 4RUNNER

INTERIOR

Comfortably take charge.

You've got freedom to roam. Outside and inside.

4Runner comfortably seats up to seven passengers and offers an expansive cargo space when the rear seats are folded down flat. The premium interior features a host of convenient amenities such as Heated Front Seats, Backup Camera, Push Button Start, and Dual Zone Automatic Climate Control. 4Runner is also compatible with Apple CarPlay™¹ and Android Auto™¹, which give you direct access to a range of helpful features that make the journey just as enjoyable as the destination.

2021 4RUNNER

PERFORMANCE

Proven toughness.

The trail doesn't end until you tell it to.

An adventure spent planning every next move isn't an adventure. That's why we've thoughtfully engineered the 2021 4Runner for every unpredictable moment that lies ahead. It features a reinforced body-on-frame construction and 270 hp V6 engine, which has the outstanding power to tow up to 2,268 kg (5,000 lb.). The available Full-Time 4-Wheel Drive and locking centre/rear differential give you the power and control you need to take on every type of trail. For unruly terrain, 4Runner also comes equipped with a standard Downhill Assist Control,² and Active Traction Control gives you the added traction you need when handling descending slopes.

PERFORMANCE

Face any challenge with confidence.

CRAWL CONTROL

The available Kinetic Dynamic Suspension System (KDSS) and Crawl Control are meant to help keep optimal traction, even on uneven terrain. KDSS automatically adjusts the suspension system for better wheel articulation, while Crawl Control automatically modulates the throttle and brakes on five low-speed settings.

MULTI-TERRAIN SELECT

Available Multi-Terrain Select allows you to choose from four modes that will regulate wheel spin by adjusting the engine throttle setting and braking pressure to provide you with maximum traction in various off road situations.

LEVER-TYPE TRANSFER CASE

4WD vehicles require a system to transfer power from the transmission to all four wheels. 4Runner TRD Off Road has a lever-type transfer case that allows you to easily switch to low range to help clear the roughest challenges.

APPROACH WITH CONFIDENCE

4Runner encourages you to take on the toughest trails. Up to 9.6 inches of ground clearance, an approach angle of 33 degrees, and a departure angle of 26 degrees on 4Runner TRD Off Road help keep the adventure going.

SAFETY

[Click to Learn More](#)

Toyota Safety Sense™

No matter what roads you travel, Toyota Safety Sense™³ (TSS-P) is always there to keep you as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2021 4Runner, and it is designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

DYNAMIC RADAR CRUISE CONTROL⁴

Using forward sensing radar technology, the system can automatically adjust vehicle speed to help maintain a preset following distance between you and the vehicle directly in front of you.

LANE DEPARTURE ALERT WITH STEERING ASSIST⁵

Alerts you if you start to drift out of your lane when visible lane markings are detected. The Steering Assist function may also provide small corrective steering inputs.

PRE-COLLISION SYSTEM WITH PEDESTRIAN DETECTION⁶

Provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. In certain conditions, the Pre-Collision System with Pedestrian Detection may also help to detect pedestrians and help prevent or mitigate a collision.

AUTOMATIC HIGH BEAMS⁷

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

**Block Heater Required (SOLD SEPARATELY, if not already installed on vehicle)*

— NEW VEHICLE WARRANTY COVERAGE —

To protect your investment and provide additional peace of mind, every new Toyota vehicle includes a comprehensive Warranty and Roadside Assistance package.

COMPREHENSIVE COVERAGE

This warranty includes 24-hour Roadside Assistance and other benefits, as well as coverage of repairs on any part of the vehicle that is defective in material or workmanship under normal use and maintenance. Different warranties apply to original tires.

3
YEARS
OR
60,000 KM

POWERTRAIN COMPONENTS

This warranty covers repairs to powertrain components that are defective in material or workmanship under normal use and maintenance.

5
YEARS
OR
100,000 KM

MAJOR EMISSION CONTROL COMPONENTS

This warranty covers repairs to specified major emission components that are defective in material or workmanship under normal use and maintenance.

8
YEARS
OR
160,000 KM

CORROSION PERFORATION

This warranty covers any sheet metal found, under normal use, to have developed a perforation from corrosion due to defects in material or workmanship.

5
YEARS
OR
unlimited
DISTANCE

— D I S C L A I M E R S —

(1) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges. (2) DAC is designed to help the driver maintain vehicle control and speed on steep downhill descents. HAC is designed to help minimize backward rolling on steep ascents. This system is not a substitute for safe driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether DAC and HAC will be effective in preventing a loss of control. (3) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (4) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (5) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (6) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions. (7) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (8) Not all exterior and interior colour options are available for every model. (9) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors.

Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of publication. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website **toyota.ca** – or your Toyota Dealer is your best source for up-to-date information.
