TOYOTA

Great things can come in small, hybrid packages.

Prius c was created with the big city in mind. As the smallest member of the Prius family, Prius c makes the most out of every situation. Its low centre of gravity design and 9.6 metre (11.4 metre for Prius c Technology) turning circle not only deliver agile and responsive handling but also make parking in the most challenging of spaces incredibly easy. With its combined fuel efficiency rating of 4.7 L/100 km, you can make short work of getting uptown, even when you're all the way downtown. Complementing its bold and sleek compact design is a modern and stylish interior with a surprising amount of space. Whether you and four friends are heading out for a night of fun, or you're configuring the seats to transport all of your gear, Prius c will always make the most out of any situation. Best of all, because over 85% of Toyotas sold in Canada in the last 20 years are still on the road today,* you can rely on discovering the city with the Prius c for years to come.

Have you driven the future yet?

Tomorrow's road will be nothing like today's. Thankfully, Toyota has been developing new mobility solutions for urban environments that will carry us all forward for many years to come. One example is the iRoad, an innovative, ultra-compact trike that provides the convenience of a motorcycle, with the comfort and stability of a car. Like the Prius c, it showcases Toyota's expertise in innovative, low impact mobility solutions for our changing world. Tomorrow's roads belong to nimble, efficient, hybrid vehicles – the kind that Toyota is now designing and building.

Good for the city. Even better for you.

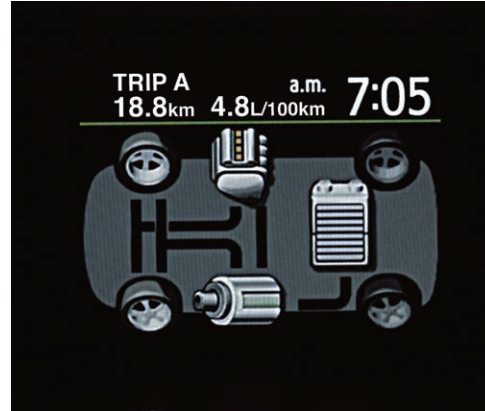

With its available Navigation system,⁵ you can easily meet friends for coffee uptown and make it to that antique shop on the other side of the city with time to spare. Thanks to the Display Audio System's⁴ unique "text-to-speech" feature, you can convert your text messages from your phone into voice messages so you can always stay connected while you're on the go. What's more, with its Bluetooth^{®3} feature, you can wirelessly stream music and make calls without having to take your hands off the wheel. In the hustle and bustle of city life, you're bound to be checking out new things in different neighbourhoods all the time. By monitoring your driving habits, the Prius c can help you achieve optimal fuel efficiency so you can continue to discover more and more.

TOUCH TRACER DISPLAY This available feature places a duplicate image of the steering wheel-mounted controls on the Multi-Information Display. A quick glance at the display allows the driver to confirm which button to press without having to look down at the steering wheel.

DRIVE MODE SELECT Different modes for different types of driving. ECO mode helps reduce fuel consumption. EV mode runs solely on battery power for up to a kilometre under certain conditions.

ENERGY MONITOR The Energy Monitor helps keep you continually apprised of the Hybrid Synergy Drive energy flow and how energy is efficiently managed and distributed.

SMART KEY SYSTEM WITH PUSH BUTTON START It's easy to get into your Prius c with style. When you're within a few feet of your Prius c with the available Smart Key, simply grasp the door handle to unlock the door. Plus, the engine starts with the push of a button.

Fits in wherever you go.

We made sure that the Prius c offers a spacious interior that's flexible and versatile enough to accommodate all that the city has in store for you. More importantly, we made sure that it is accessible – so when you've got your hands full, its four doors open wide so you can enter with ease and a rear liftgate provides unencumbered access to the rear cargo area. Thanks to interior features like soft-touch materials throughout the dash, an available moonroof, and available SofTex®-trimmed heated front seats, Prius c ensures that you and your passengers always get a premium experience with every drive.

Safety
Sense

Breathe easy, even in the city.

Your safety is always our first priority. That's why we've engineered the 2016 Prius c with integrated features like the Star Safety System™ and the available Toyota Safety Sense (TSS-C)™. Our newly developed Toyota Safety Sense is an active safety package that combines Pre-Collision System (PCS),⁹ Lane Departure Alert (LDA),¹⁰ and Automatic High Beams (AHB).¹¹ Each safety feature is designed to help support your awareness and decision making on the road.

AUTOMATIC HIGH BEAMS¹¹ The available Automatic High Beam (AHB)¹¹ system helps detect oncoming vehicles and, depending on the circumstances, automatically switches the high beams on and off, making it easier for other drivers on the road.

PRE-COLLISION SYSTEM⁹ The available Pre-Collision System (PCS)⁹ is designed to help recognize and anticipate unavoidable frontal collisions by automatically applying the brakes and retracting the front seatbelts to help you prepare for such a scenario.

9 AIRBAGS¹ Prius c comes equipped with nine standard airbags¹ including: driver and front passenger airbags, front seat-mounted side airbags, a driver's knee airbag, front and rear head/side curtain airbags, and front seat cushion airbags.

LANE DEPARTURE ALERT¹⁰ Available Lane Departure Alert (LDA)¹⁰ helps you stay in your lane. The system detects painted lane markings on the road and alerts you if you start to drift out of your lane. An audible beep and flashing light on the instrument panel alert you to take corrective action.

Disclaimers

(1) All Toyota vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Toyota Dealer. (2) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (3) Do not use the hands-free phone system if it will distract you. A compatible Bluetooth®-enabled phone must first be paired. Phone performance depends upon software, coverage and carrier. (4) Driving while distracted can result in loss of vehicle control. Always drive safely, obey traffic laws and focus on the road and traffic conditions while driving. (5) Availability and accuracy of the information provided by the navigation system is dependent upon many factors. Use common sense when relying on information provided. Services and programming subject to change. Services not available in every city or roadway; updates may be available at an additional cost from your Dealer. Please see your Navigation System Owner's Manual and your Toyota Dealer for further details. (6) Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC will be effective in preventing a loss of control. Please see your Owner's Manual for further details. (7) Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. (8) Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions, and driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. Please see your Owner's Manual for further details. (9) The Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision-avoidance system or a substitute for safe and attentive driving. (10) Lane Departure Alert is not a collision-avoidance system or a substitute for safe and attentive driving. (11) Automatic High Beam system operates at speeds above 40 km/h. Situations such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn off. See Owner's Manual for details. (12) HAC is designed to help minimize backward rolling on steep ascents. This system is not a substitute for safe driving judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. Please see your Owner's Manual for further details. (13) The maximum output indicates engine plus HV battery output.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing.
