## ACCESSORY ADD-ON KITS

### 2007-09 MUSTANG GT SHAKER HOOD SCOOP KIT (0711-7000-01)

**\$835.00 + \$360.00 = \$1195.0**

This Ram Air/Cold Air Package includes all the duct work to make it fully functional with your factory air box. The kit includes a pre-assembled engine dress-up cover with cast aluminum scoop. The Shaker was engineered with multiple water management systems to prevent water from entering the engine, making foul-weather driving concerns a thing of the past. The CDC Shaker System utilizes the factory air box retrofitted with a High Flow/High Performance S&B Filter (included), so engine flashing is not necessary. With a little creativity, the Shaker system can easily be adapted to most aftermarket cold air intake systems as well. The Shaker installs using your stock aluminum hood which you may have noticed has a factory-stamped recess in the hood's inner layer. This element was included by Ford specifically for the CDC Shaker to maintain the structural integrity of the hood after the hole has been cut. PLEASE NOTE: SHAKER TRIM RING DOES NOT COVER THE FACTORY HOOD SCOOP HOLES (07+ FACTORY HOOD SCOOPS) that are left after the factory hood scoops are removed.

### 2005-09 MUSTANG CLASSIC LIGHT BAR (110000 Charcoal)

**\$463.00 + \$480.00 labor = \$943.00**

This Classic Light Bar has kept the high quality, attention to fit and finish and has also simplified the installation process. The light bar has been engineered to fit the curves and natural lines of the vehicle to provide a factory fit. The high mounted LED light provides added safety with a highly visible brake light. If rain should attempt to spoil your cruise no fear, the factory top effortlessly fits over the light bar and the Classic Light Bar does not interfere with any original factory functions. The light bar is constructed of a sturdy 1 1/4" round steel tube, with a 1/8" wall thickness. This polyurethane piece is wrapped in vinyl, grained to match your car's interior trim.

**Additional colors available for an additional cost.**
