HS\* = Feature is a component of the Honda Sensing™ suite of safety and driver assist features.

1. Accessory towing kit required. Kits are available at an additional cost as a dealer-installed item. See your Owner's Manual for proper towing operation.
2. None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit [www.honda.ca/disclaimers](http://www.honda.ca/disclaimers) and refer to the vehicle's Owner's Manual.
3. Only compatible with certain devices and operating systems. Cellular data and/or voice charges may apply, including roaming charges and/or other amounts charged by your wireless carrier.
4. Operation requires wireless mobile phone to be paired with the vehicle. Operation is dependent upon cellular data and/or voice connection availability and GPS satellite signal reception.
5. For optimal tire wear and performance, the pressure should be checked regularly with a tire gauge. Do not rely solely on the monitor system.
6. HomeLink® can be programmed with codes of up to three remote-control devices (e.g., garage-door opener, home security system, etc.).
7. Only available in certain areas. Includes a no-charge trial of three months.
8. Map database covers major metropolitan areas in Canada and the 48 contiguous U.S. states.
9. Coverage varies by market.
