

*At the Willis Auto Campus we endeavor to maintain a tradition of automotive excellence and service leadership built upon the principle of treating each customer like a "Guest in our Home".*

## THE TRADITION CONTINUES

In 1947, Charles H. Betts, Sr. established Betts Cadillac with a mission of service leadership and automotive excellence. In 1988 we began a process to purchase the dealership and in 2008, the name officially changed to the Willis Auto Campus. Over the years, we've expanded our dealership to include Cadillac, Lexus, MINI, Volvo, Jaguar, Land Rover, and Infiniti vehicles. We have established a tradition of treating each customer like a guest in our home. We are proud of our state-of-the-art dealership and look forward to assisting you with your automotive needs.

*- Rich Willis, President*

## OUR MISSION STATEMENT

Professional ladies and gentlemen dedicated to exceeding customer expectations while maintaining the highest standards of respect and integrity.

## RECOMMENDED SERVICES

**Lube, Oil & Filter** (up to 5 qts.) **\$45.99\*\***

**Synthetic Oil Service** (up to 5 qts.) **\$72.00\*\***

**Engine Deposit Control w/ Roadside Assistance \$15.00\*\***  
Our Engine Oil Supplement has been specially formulated with additives that keep your engine clean and reduce friction and wear. Concentrated antioxidants keep oil from thickening and sludge from forming in the engine. An effective detergent/dispersant package maintains engine cleanliness. Unique anti-wear ingredients have the effect of smoothing and sealing the surface of moving parts, thus reducing friction and wear in the engine.

**Fuel System Tune-Up \$159.95\*\***

Utilizing specially designed equipment and the latest start-of-the-art technology, our technicians quickly and effectively clean your engine's fuel injectors, combustion chamber, intake valves and throttle body. Our fuel system tune-up will restore fuel economy and performance while decreasing harmful exhaust emissions, by removing harmful deposits, gums and varnishes from your engine.

**Complete Transmission Service \$259.95\*\***

**Complete Synthetic Transmission Service \$305.59\*\***

Over ninety percent of all transmission failures are due to overheating and fluid contamination. Our technicians use specially designed equipment that hooks up to your vehicle. With the use of custom-blended chemicals, we will safely and effectively remove harmful sludge, varnish deposits and old transmission fluid. Fresh transmission fluid is then pumped in, along with a transmission conditioner that extends transmission fluid life, as well as revitalizing seals and o-rings for longer life and better performance from your transmission.

**Coolant System Flush \$159.95\*\***

Coolant system failure is the leading cause of mechanical failure while driving on the highway. To help protect the long-term health of your vehicle, it is important that your coolant system be serviced. Our technicians use specially designed equipment that hooks into the vehicle's coolant system. With the use of custom-blended chemicals, we safely and effectively remove old, contaminated coolant from the vehicle. New coolant is then pumped back in to your vehicle, as well as a supplement that can help prevent minor coolant leaks, foaming and corrosion.

**Power Steering Service \$89.95\*\***

Dirty, neglected power steering fluid can look like used engine oil and can compromise the performance of your steering system. Our technicians use a proven system that removes old power steering fluid from the vehicle. A cleaner is then injected into the steering system that is formulated to remove sludge and varnish from your power steering system. We then refill the vehicle's power steering system with the manufacturer's recommended fluid. This service restores steering performance and helps avoid premature, unexpected steering system failure.

**Complete Brake Fluid Service \$129.95\*\***

Over the life of your vehicle, brake fluid will become contaminated with water and other contaminants that can eventually lead to a weak or spongy brake pedal and in some instances, premature brake system failure. Using state-of-the-art equipment, our technicians will safely and effectively remove all old brake fluid and replace it with new manufacturer recommended brake fluid.

**Differential or Transfer Case Service (per axle) \$89.95\*\***

Using state-of-the-art equipment, our technicians will safely and effectively remove all old differential fluid and replace it with new manufacturer recommended differential fluid.

Prices may change without notice. \*\*Some models additional.

Follow our shop-recommended service intervals and you're protected for the lifetime of your vehicle.
